(+20) 1025440707

Egypt, Alexandria

I'm a Full-Stack Web Developer with expertise in React, Next.js, TypeScript, Node.js (NestJS/Express), and .NET Core (C# + MSSQL). I focus on creating scalable, user-friendly applications, from e-commerce platforms and APIs to CMS-driven websites with SEO and multilingual support.

Alongside web development, I bring added strengths in IoT, electronics, and networking, which help me design solutions that connect digital and physical systems. My academic background in education and sociology further strengthens my ability to think strategically, communicate effectively, and adapt to different challenges.

Work Experience

Full Stack Web Developer

Feb 2024 - Present

Tax Consultancy | United Arab Emirates

- Developed and deployed dynamic, high-performance web applications with a focus on scalability and maintainability.
- Integrated RESTful and third-party APIs for real-time data processing, enhancing system responsiveness and overall user experience.
- Designed and implemented secure authentication and authorization systems using JWT and OAuth standards.
- Applied Agile methodologies, microservices architecture, and DevOps principles to streamline development, deployment, and collaboration workflows.
