Profile

Full-Stack Web & Web Solutions Developer with **real-world experience delivering enterprise-level applications** and **IoT-integrated solutions**. Worked on projects in the **Egypt, United Arab Emirates** to digitize services and streamline business processes. Strong expertise in **JavaScript, Typescript frameworks and libraries** (Node.js, Nest.js, React, Next.js), with experience in cloud platforms (**AWS, Google Cloud**) and database management (**MongoDB, MySQL, PostgreSQL**). Additional exposure to **Java and C# .NET** technologies. Skilled in building scalable, secure, and interactive web solutions that integrate frontend, backend, and IoT/cloud services.

Professional Experience

Full-Stack Web Developer, Freelance / Projects

05/2025 – Present
Remote

- Developed **full-stack web applications** for clients to digitize services.
- Designed and implemented interactive UIs using React.js, Next.js, and TypeScript.
- Worked on projects involving both **NoSQL (MongoDB)** and **SQL (MySQL, PostgreSQL)** databases.
- Collaborated with international teams and stakeholders to deliver high quality solutions.

Full Stack Web Developer, Tax Consultancy

07/2023 – 04/2025
UAE, Dubai

- Developed full-stack applications for UAE businesses to digitize internal workflows, including a **proposal management system** with a custom **drag and drop form builder**, authentication, dashboards, and data workflows.
- Built dynamic, responsive websites and UI systems featuring contact forms, media sections, galleries, and client-side interactions using **Next.js, React, TypeScript**.
- Integrated backend services using **Node.js / Express / NestJS**, implementing REST APIs, secure authentication (JWT/Refresh Tokens), role-based access control, and form data processing.
- Designed and managed databases with both **NoSQL (MongoDB)** and **SQL (MySQL, PostgreSQL)** including schema design, indexing, and querying.
- Collaborated with clients in UAE to transform manual services into **fully digitized solutions**, improving efficiency and reducing time spent on paperwork.

IoT-Integrated Web Developer (Hands-on Real Word Projects),

Egypt, Mansoura

ITI, Ministry of Communications and Information Technology – Internet of Things Track

- Developed full-stack web dashboards and data visualization tools for IoT applications, connecting embedded devices via MQTT/HTTP to cloud platforms.
- Built real-time analytics dashboards with live sensor data using **WebSockets, Cloud Functions**, and **APIs**.
- Integrated IoT systems with **Google Cloud IoT Core, AWS IoT**, enabling secure device communication and storage pipelines.
- Created monitoring interfaces for smart systems such as smart parking, smart bags, and motion tracking IoT solutions.

Projects

Proposal System (MERN Stack) (UAE - Tax Consultancy), Full-stack web application with authentication (JWT), drag-and-drop form builder, data binding, state management, email notifications, generate dynamic response (pdf). Technologies: (Typescript, Node.js, React.js, RTK, MongoDB, Express, pnpm workspace/monolithic)

UI Websites & CMS-Driven Content System (Next.js + PayloadCMS, Strapi), Developed multiple responsive UI websites powered by Payload CMS / Strapi, enabling clients to fully manage pages, blogs, media, and SEO data through a headless CMS. Implemented custom collections, authentication, secure uploads, localization (Arabic/English), and real-time API integration with Next.js frontend. Delivered fast, scalable, and easily maintainable web solutions.

E-Commerce Platform (MERN Stack), Online store with product catalog, cart system, payments, role based authentication, admin dashboard, CRM, order management, POS, review, comments.
Technologies: (Node.js, React.js, RTK, MongoDB, Express, react-paypal)

Blogs & Content System (MERN Stack), CMS-like system for publishing, managing posts, roles based authentication, Admin Dashboard, CRM, comments.
Technologies: (Node.js, React.js, RTK, MongoDB, Express, Cloudinary third party)

Conference Audio/Video App (Next.js + WebRTC), Real-time audio/video communication web app with modern UI, Authentication, OAuth, Chat, Records, Schedule meeting, and monitor connection latency.
Technologies: (React.js, Next.js, Clerk Auth, MongoDB Atlas)

Library / Management System (Java + Spring Boot), Backend-focused system showcasing experience in Java, OOP, and structured backend development, (Authentication, Time frame based Fees, CRUD operations)
Technologies: (Java, Spring boot, MVC, Bootstrap, hibernate, maven, MySQL)

(Full projects available at: <https://khaled-web.vercel.app/projects>)

Skills

Frontend — Expert

- React.js, Next.js, Angular.js, TypeScript (SSR, CSR)
- HTML, CSS, Javascript ES6, AJAX, JSON
- Modern UI/UX, animations, responsive design
- Component architecture, state management (Context API, Redux toolkit, NgRx)
- lazy loading and performance optimization

Databases — Proficient

- NoSQL: MongoDB, MySQL, PostgreSQL
- ORM/ODM (Prisma, TypeORM, Mongoose)
- Database design, indexing, query optimization

DevOps & Architecture — Amateur

- SOLID principles, CDD, DDD, layered architecture
- Microservices, Docker, CI/CD workflows
- Git, GitHub, version control workflows
- Agile/Scrum teamwork experience
- AWS, Google Cloud, Vercel / Netlify deployments
- Linux server management (Ubuntu), Bash scripting
- Apache web server configuration

Backend — Proficient

- **Node.js, Express.js, NestJS**
- REST API design, MVC architecture, modular
- Dependency Injection, Providers, Guards, Interceptors
- Authentication & Authorization (JWT, OAuth2, Sessions)
- Error handling, logging, rate-limiting, middleware
- **Unit Testing:** Jest, **End-to-End (E2E) Testing:** NestJS e2e testing tools, Postman collections

API & Integration — Amateur

- RESTful API standards
- WebSockets, real-time communication
- IoT platform integration (GCP IoT Core, MQTT)
- Third-party API integration (payments, auth, services)
- Deep knowledge in Network (Logical/physical) and VoIP systems.
- Deep knowledge in electronics and embedded system

Education

Technical Diploma (ITI Scholarship), Information Technology Institution 07/2020 – 08/2021
Internet of Things & Embedded, Software Engineering, MERN, Cloud Platforms. Egypt, Mansoura

Higher Diploma, Educational Technology 05/2015 – 06/2016

Bachelor Degree, University of ART, Anthropology, Sociology 2010 – 2014

Achievements

- Delivered several full-stack solutions for UAE clients, helping businesses digitize manual workflows.
- Built a proposal system with drag-and-drop form builder and dynamic UI, a key project that improved client operations.
- Successfully integrated web apps with cloud-based IoT platforms for real-time monitoring and control.
- Designed and deployed complete front-end experiences for corporate websites and service portals.
