Professional Summary

Full-Stack Web Developer with hands-on experience designing and delivering production-ready business platforms, internal systems, and dashboards for clients in Egypt and the UAE. Specialized in building secure backend APIs, role-based systems, and modern React / Next.js interfaces that replace manual workflows with structured, scalable software.

Background in IT infrastructure, networking, and IoT systems, providing strong production awareness and system-level thinking beyond typical web development.

Professional Experience

Full-Stack Web Developer - Freelance / Client Projects

2025 - Present | Remote

- Designed and developed full-stack web applications to digitize internal business workflows and service operations.
- Built secure backend APIs using Node.js, Express, and NestJS with JWT-based authentication and role-based access control.
- Developed modern frontend interfaces using React, Next.js, and TypeScript with a focus on maintainability and performance.
- Designed and optimized databases using MongoDB, PostgreSQL, and MySQL, including schema design and query optimization.
- Collaborated with international clients and stakeholders to deliver production-ready systems aligned with real operational needs.

Full-Stack Web Developer - Tax Consultancy (UAE)

2023 - 2025 | On-Site

- Led development of internal business platforms to digitize manual workflows for UAE-based clients.
- Built a proposal management system featuring a custom drag-and-drop form builder, authentication, dashboards, and automated document generation.
- Implemented backend services using Node.js and NestJS, including REST APIs, validation, logging, and error handling.
- Developed responsive, scalable user interfaces using Next.js, React, and TypeScript.
- Designed and maintained both NoSQL and SQL databases, ensuring data integrity and performance.
- Worked directly with clients to translate business requirements into stable, scalable software solutions.

IoT-Integrated Web Developer - ITI (Internet of Things Track)

2022 – 2023 | Egypt - Mansoura | (Hands-on labs)

- Developed full-stack dashboards and monitoring systems for IoT applications using real-time data pipelines.
- Integrated embedded devices with cloud platforms using MQTT, HTTP, and WebSockets.
- Built data visualization interfaces for live sensor data and system monitoring.
- Gained hands-on experience with cloud services, device communication, and system integration.

Earlier Technical Background (Condensed)

- Background in IT infrastructure, networking, VoIP systems, and electronics maintenance.
- Experience with Linux systems, network protocols, and hardware-software integration.
- This background informs a strong understanding of production environments and system reliability.

Projects (Selected)

(See full descriptions below or at <https://khaled-web.vercel.app/projects>)

- Proposal Management System — UAE
- CMS-Driven Business Websites
- E-Commerce Platform
- Conference Audio / Video Web Application
- IoT Monitoring Dashboards

Technical Skills

Frontend

React.js, Next.js, TypeScript, HTML, CSS, modern UI systems, state management

Backend & APIs

Node.js, Express, NestJS, REST APIs, authentication & authorization (JWT, OAuth), RBAC

Databases

MongoDB, PostgreSQL, MySQL, Prisma, TypeORM, Mongoose

Infrastructure Awareness

Linux, deployment pipelines, networking fundamentals, IoT integration (MQTT)

Education

Information Technology Institute (ITI) - Technical Diploma

Internet of Things, Embedded Systems, Software Engineering, MERN, Cloud Platforms

Higher Diploma - Education Technology

Bachelor Degree - Faculty of Arts
